

Introducing Cultural and Spiritual Care into Your Nursing Practice

Tuesday, October
27, 2026

1200-1300 EST

Intended audience:
All nurses

This presentation examines how you, as a health practitioner, fit into the cultural, spiritual, emotional, existential space held by patients. You will be asked to think about how your beliefs, culture, spirituality and values can have an enduring impact on the patients and families for whom you care. We will explore the questions to ask to assess someone's cultural and/or spiritual needs, how to ask them in a sensitive manner and how to respond appropriately and compassionately. This presentation will explain when to refer to a Spiritual Care Practitioner. And, finally, we will have an open discussion to address any issues of concern such as how to assess and respond when you do not have much time.
